Special Issue

Molecular Dosimetry and Analysis of Mutations for Estimation of Genetic Risk

edited by William R. Lee

Preface
William R. Lee (U.S.A.) 1

I.
The importance of molecular dosimetry and analysis of mutations for estimation of genetic risk
W.R. Lee (U.S.A.) 3

II. Determination of molecular dose and dose–response curves
Distribution of methyl and ethyl adducts following alkylation with monofunctional alkylating agents
D.T. Beranek (U.S.A.) 11
Comparison of dose–response relationships for ethyl methanesulfonate and 1-ethyl-1-nitrosourea in *Drosophila melanogaster* spermatozoa
W.R. Lee, D.T. Beranek, B.J. Byrne and A.B. Tucker (U.S.A.) 31
A dose–response analysis of ethylnitrosourea-induced recessive specific-locus mutations in treated spermatogonia of the mouse
J. Favor, M. Sund, A. Neuhäuser-Klaus and U.H. Ehling (F.R.G.) 47
DNA adduct formation in mouse testis by ethylating agents: a comparison with germ-cell mutagenesis
A.A. Van Zeeland, A. De Groot and A. Neuhäuser-Klaus (The Netherlands, F.R.G.) 55

III. Characterization of mutations induced at specific loci in germ cells
Mutations induced at the *white* and *vermilion* loci in *Drosophila melanogaster*
A. Pastink, C. Vreeken, E.W. Vogel and J.C.J. Eeken (The Netherlands) 63
Analysis of ENU-induced mutations at the *Adh* locus in *Drosophila melanogaster*
N.G. Fossett, P. Arbour-Reily, G. Kilroy, M. McDaniel, J. Mahmoud, A.B. Tucker, S.H. Chang and W.R. Lee (U.S.A.) 73

IV.
Review of the molecular characteristics of gene mutations of the germline and somatic cells of the human
H.W. Mohrenweiser and I.M. Jones (U.S.A.) 87
[*end of special issue*]

Research Papers
X-Ray-induced specific-locus mutations in the *ad-3* region of two-component heterokaryons of *Neurospora crassa*. VI. Induction kinetics of gene/point mutations, multilocus deletions and multiple-locus mutations
F.J. De Serres (U.S.A.) 109
Inhibition of meiotic divisions of rat spermatocytes in vitro by polycyclic aromatic hydrocarbons
A. Georgellis, J. Toppari, T. Veromaa, J. Rydström and M. Parvinen (Sweden, Finland) 125
The effect of low-dose X-irradiation on numerical and structural chromosome anomaly induction in mouse immature oocytes
C.S. Griffin, C. Tease and G. Fisher (Great Britain) 137
Induction of characteristic chromosomal aberrations, particularly X-trisomy, in cultured human lymphocytes treated by ochratoxin A, a mycotoxin implicated in Balkan endemic nephropathy
Y. Manolova, G. Manolov, L. Parvanova, T. Petkova-Bocharova, M. Castegnaro and I.N. Chernozemsky (Bulgaria, France) 143
Stimulation of mutations suppressing the loss of replication control by small alcohols
S. Hayes, C. Hayes, D. Duncan, V. Bennett and J. Blushke (Canada) 151

0027-5107/90/$03.50 © 1990 Elsevier Science Publishers B.V. (Biomedical Division)

Molecular analysis of complex human cell populations: mutational spectra of MNNG and ICR-191
N.F. Cariello, P. Keohavong, A.G. Kat and W.G. Thilly (U.S.A.) 165
High levels of chromosome instability in polyploids of *Saccharomyces cerevisiae*
V.W. Mayer and A. Aguilera (U.S.A.) 177
Enhanced mutability at the tk locus in the radiosensitive double-strand break repair mutant *xrs5*
T.A.K. Mussa, B. Singh and P.E. Bryant (Great Britain) 187
Role of the carbamoylation reaction in the biological activity of methyl nitrosourea
A.M. Serebryanyi, L.E. Sal'nikova, L.M. Bakhitova and Y.V. Paschin (U.S.S.R.) 195
Epoxides: comparison of the induction of SOS repair in *Escherichia coli* PQ37 and the bacterial mutagenicity in the Ames test
W. Von der Hude, A. Seelbach and A. Basler (Germany) 205
Detection of deletions, insertions and single nucleotide substitutions in cloned β-globin genes and new polymorphic nucleotide substitutions in β-globin genes in a Japanese population using ribonuclease cleavage at mismatches in RNA : DNA duplexes
K. Hiyama, M. Kodaira and C. Satoh (Japan) 219
The induction of chromosomal aberrations and SCEs by visible light in combination with dyes II. Cell cycle dependence, and the effect of hydroxyl radical scavengers during light exposure in cultures of Chinese hamster ovary cells sensitized with acridine orange
A.H. Uggla (Sweden) 233
Antimutagenic effects of mushrooms
A. Grüter, U. Friederich and F.E. Würgler (Switzerland) 243
DNA repair induced by various mutagens in rat hepatocyte primary cultures measured in the presence of hydroxyurea, guanazole or aphidicolin
W. Suter and F. Romagna (Switzerland) 251
Isolation of Chinese hamster ovary cells with reduced poly(ADP-ribose) polymerase activity
R.A. MacLaren, M.V. Witmer, E. Richardson and T.D. Stamato (U.S.A.) 265
